

Intralox Thermo-Drive Conveyors

M.H. in partnership with Intralox, Worldwide leader of the Plastic Modular Chain market, produces and sell conveyors realized with the brand new Thermo Drive System.

The Thermo Drive system is the perfect solution for all the applications where a high level of sanitation and cleaning is required.

Trough conveyors, straight belt and clamp elevators are just the main application that can be realized with this product.

Thermo Drive is the best way for conveying naked food products, holding together the advantages of modular chain conveyors and belt conveyors

These are the main features:

- 80% reduction of water and detergents consumption
- Improves products outlet and reduces waste
- Reduces maintenance cost and timings
- Reduces energy consumption
- FDA certified and developed according to AMT's specifications.
