

## Modular Spiral Conveyors

Spiral Conveyors by M.H. are realized with plastic modular chain are the most versatile solution for a wide range of applications such as:

- Elevating or De-elevating
- Buffering or Accumulation
- Conditioning systems
- Gyro Freezers

The rotating drum allow to realize very long tracks with a **reduced installed power**.

The vast range of plastic modular chains make these conveyors suitable to deal with many different products, beginning with the naked product in the food industry till the most heavy cases and bottles.

The main advantages of Modular Spiral Conveyors are:

- Reduced energy consumption
- Great versatility
- Reduced maintenance
- Easy to operate
