

Clamp Elevators

M.H. design, build and install clamp elevators for use in the food industry suitable for any product and environment.

Thanks to the wide range of Intralox's Modular Chains we offer versatile and highly cleanable solutions.

Clamp Elevators realized with plastic modular chain are more reliable, easy to use and to maintain than traditional belt or bucket elevators.

The perfect solution for continuous feeding for ceiling lines, vertical packaging machines and multi head weighing machines. M.H.'s clamp elevators are designed for use with naked food products such as:

- cheese products
- particles and seeds
- fresh and dry pasta
- candies and sweets
- fresh vegetables
- frozen food
